SUMMARY

Results-driven Flutter Developer with a proven track record of building high-performance, cross-platform mobile applications for Android and iOS ecosystems. Highly adept at translating complex specifications into intuitive, optimized UI/UX layouts, implementing clean architectures, and seamlessly connecting web services and custom RESTful APIs. Demonstrated success driving full-lifecycle developments across e-commerce solutions, dynamic chat platforms, and highly sensitive national healthcare systems.

TECHNICAL SKILLS & EXPERTISE

Languages & Frameworks: Dart, Flutter SDK, Java, C

APIs, Integrations & State Management: RESTful APIs, JSON Decoder, WebSockets, ABHA M1 Integration, GetX, BLoc, Provider, JWT, Google SDKs

Database & Cloud: Firebase Cloud Firestore, Realtime Database, SQLite, AWS Caching Concepts

Tools & Architecture: Android Studio, Git, GitHub, Postman, MVC, Clean Architecture Principles

Core Competencies: Responsive UI/UX Design, Reusable Component Architecture, Mobile App Performance Optimization, Memory Management

PROFESSIONAL EXPERIENCE

Flutter Developer

Jul 2024 – Present

Timesmed Healthsoft Pvt Ltd. *Chennai, India*

- Design, architect, and optimize cross-platform mobile applications using Flutter and Dart framework tools.
- Spearhead the end-to-end frontend overhaul and API restructuring of healthcare applications to improve information density on diagnostic screens.
- Lead technical implementations and security adherence checks for highly impactful state and national digital healthcare integrations.
- Collaborate closely with backend engineers and product owners to resolve performance constraints, memory leaks, and complex data-binding modules.

Flutter Developer (Intern)

Dec 2023 – Feb 2024

Teckzy Research Analytics IT Solutions Pvt. Ltd *Chennai, India*

- Developed scalable Android applications within the Android Studio environment utilizing Flutter toolsets.
- Implemented multi-tasking interfaces including deep dynamic ListViews, dynamic GridViews, responsive Bottom Sheets, Bottom Navigation Bars, and advanced search filters.
- Connected asynchronous RESTful web services with robust error handling via JSON decoding and managed real-time views utilizing the GetX state controller framework.

KEY PROJECTS

Makkalai Thedi Marutuvam (MTM) Application

Stack: Flutter, Dart, REST APIs, JSON Decoder, Git

Collaborated closely on the flagship public health initiative under the National Health Mission in Tamil Nadu. Successfully executed functional testing, user interface updates, and integrated secure core REST APIs to enable efficient fieldwork triage and patient indexing.

ABHA M1 Core Integration

Stack: Flutter, Dart, ABDM Production APIs, Security Compliance Headers

Engineered the production migration for Ayushman Bharat Digital Mission (ABDM) integration. Successfully resolved complex production token issues, handled header authentications, and seamlessly implemented M1 milestone capabilities for direct ABHA ID generation.

TAEI (Tamil Nadu Accident and Emergency Care Initiative) Portal & Application

Stack: Flutter, Dart, High-Density JSON Testing, State Architecture

Overhauled mobile UI workflows specifically targeting real-time emergency triage environments. Restructured layouts using strict information hierarchies to facilitate zero-latency data visualization for critical care doctors.

TimesMed Doctor-Patient Platform

Stack: Flutter, Dart, Provider, Custom Telehealth Layouts

Designed and deployed interactive modern dashboard screens linking healthcare providers with real-time vitals and patient metrics. Optimized layout rendering to prevent thread blockages during prolonged live monitoring sessions.

Foode - Dine-in & Delivery Application

Stack: Flutter, Dart, Google Maps SDK, Live Geolocation, GetX

Created the frontend framework and unified the communication APIs for a combined restaurant ordering, seat reservation, and doorstep shipment model. Handled live location sets, real-time map styling, and state-reactive tracking updates.

DailyFresh E-Commerce Application

Stack: Flutter, Dart, GetX Controller, RESTful Web Services

Architected an interactive mobile grocery and retail platform. Designed and bound a smooth, asynchronous catalog flow running through GridViews, structural item listings, dynamic local caching baskets, and rapid checkout payment screens.

Howdy Chats App Portal & Application

Stack: Flutter, Dart, Firebase, WebSockets, Material UI

Crafted responsive user experiences and specific layout panels for a text-based communication platform. Implemented asynchronous web-socket binding to support high-efficiency message transmission, status syncing, and immediate screen refreshes.
